

EMH

Electric Wire Rope Hoist

Design Features

- Two speeds for hoist and trolley (6:1 for hoisting, 4:1 for travel)
- Various space-saving trolley configurations
- Modular construction with optimally matched components
- Compact design, very low headroom.
- Lifetime lubricated, totally enclosed gear trains
- Lang-lay pre-formed high strength wire rope with steel core
- Direct drives
- Heavy duty, wear-resistant rope guide
- Two upper and one lower geared limit switches
- DC rectified brakes
- Quick disconnect plugs for easy installation and service
- Standard overload limit switch
- For other design features covering all the components of the EMH Overhead Crane, please refer to the System 2000 Crane Kit Section.
